

Virtual CISO

Prevention is always better than the cure.

Security Confidence

- Compliance Management
- Drive Security Objectives
- Improve Security
- Operationalize Security
- Reduce Risk
- Security Governance

Challenge

The enterprise is facing a risky combination of mounting security threats of increasing subtlety and a widening gap in the skills required to identify and combat them. Knowing how to lead the charge in identifying and analyzing threats, creating strategic security plans, and ensuring compliance, requires a certain expertise.

Many businesses, especially small and medium businesses, simply don't have it.

Research firm ESG indicates the cybersecurity skills shortage has been getting consistently worse since 2014. In 2018 51% of respondents claimed their organization had a problematic shortage of cybersecurity skills.

Clearly it's going to take time to fill this gap, but if the talent isn't available right now, what are companies supposed to do?

Enter the Virtual CISO

Perhaps it's time to consider a less traditional approach. There are lots of reasons to consider a Virtual CISO. If you're suffering from attrition and need someone to step in on an interim basis, if you want some supervision and advice for a relatively green infosec manager, or if you want to ensure that you only pay for what you actually need, then a Virtual CISO could be the answer.

It's a flexible solution. You can set up a retainer for a certain number of hours, you can hire someone on a project basis, and/or you can even buy a chunk of support hours and use them when you need them. It's a way of getting the cream of security talent for just a fraction of the cost. And it's totally scalable.

ASSESSMENTS

COMPLIANCE

GOVERNANCE

SOLUTIONS

Insight and guidance. Security success.

Contracting a Virtual CISO is far more cost effective than hiring one full time. They can fill in where you need it the most, helping your CIO pull together security policies, guidelines, and standards. That could entail anything from getting to grips with HIPAA or PCI compliance to staying on top of vendor risk assessments. Our qualified Virtual CISO's are certified and fully up to speed on the latest best practices. They have experience dealing with wide variety of scenarios, and are well-placed to train your internal security staff.

- Reduce risk by identifying quick wins and areas of improvement
- Improve the net security level of the organization
- Support the information security objectives of the organization
- Represent information security on executive, operations, audit and risk related activities
- Support in developing, evaluating, recommending, selecting and implementing controls

Our vCISO program includes immediate discounted access to any service Ezentria offers:

- Information security leadership and guidance support
